

WASHINGTON, DC

DATA SCIENCE & ANALYTICS

DATA SCIENCE — the analysis of data to uncover patterns that provide business insights, such as customer preferences or market trends — can help organizations and firms raise productivity, improve decision making, and gain competitive advantage.

DC's proximity to policy influencers, strong technology sector, and access to top talent make it a leading city for data science and analytics firms.

Data analytics companies in DC are already helping top companies, institutions, healthcare giants, government entities and firms raise productivity, improve decision making, and gain competitive advantage.

Demand for data analytics is expected to increase by over 50% to \$203 billion by 2021, and DC is a natural hot spot for the industry.¹ With a high concentration of healthcare, education and government entities, DC's landscape provides ample opportunity for innovation. This sector includes companies working in various areas:

Business analytics
hardware, software
and services

Data visualization
or presentation
services

Electronic health
records analysis and
other healthcare
applications

Financial predictive
analytics and other
financial sector and
insurance applications

Big data
management
and policy

DATA SCIENCE & ANALYTICS

WHY DATA ANALYTICS COMPANIES CHOOSE WASHINGTON, DC

- **Access to the U.S.'s most educated workforce:** With access to plenty of seasoned data professionals — many with experience handling large and confidential datasets — DC companies are leading the way in data science and analytics innovations. Complemented by deep policy expertise, the highest concentration of lawyers per capita in the U.S., and a thriving tech industry, the DC workforce has the skills data companies need.
- **Large customer base:** DC is home to many institutions and companies that are hungry for data analytics and business intelligence, including the federal government, hospitals, and Fortune 500 companies - such as Amazon Web Services and Capital One - and national nonprofits.
- **Concentration of interested investors:** Investors are watching this industry closely, and DC data analytics companies are faring well securing investment. Of the 209 DC-area venture capital deals in 2016, 34% of them went to data analytics companies, up from 29% in 2015.²
- **Proximity to policy and regulatory agencies:** Regulation has played a major role in shaping this industry, creating requirements that spur new data streams (such as electronic health records) as well as regulations that govern data management. Being in DC makes interacting with the agencies driving these decisions feasible.
- **Culture of data science entrepreneurship:** DC has many incubators and co-working spaces that support entrepreneurs in the data science, analytic and management field, such as 1776, DCode42, and Open Gov Hub.
- **Data science innovation:** Leaders in data science are already innovating in DC. From Booz Allen Hamilton's National Data Science Bowl, which uses data to solve problems in heart disease and ocean conservation, to numerous networking groups like Data Community DC, the District is already home to experts transforming the field.
